

New Product Release

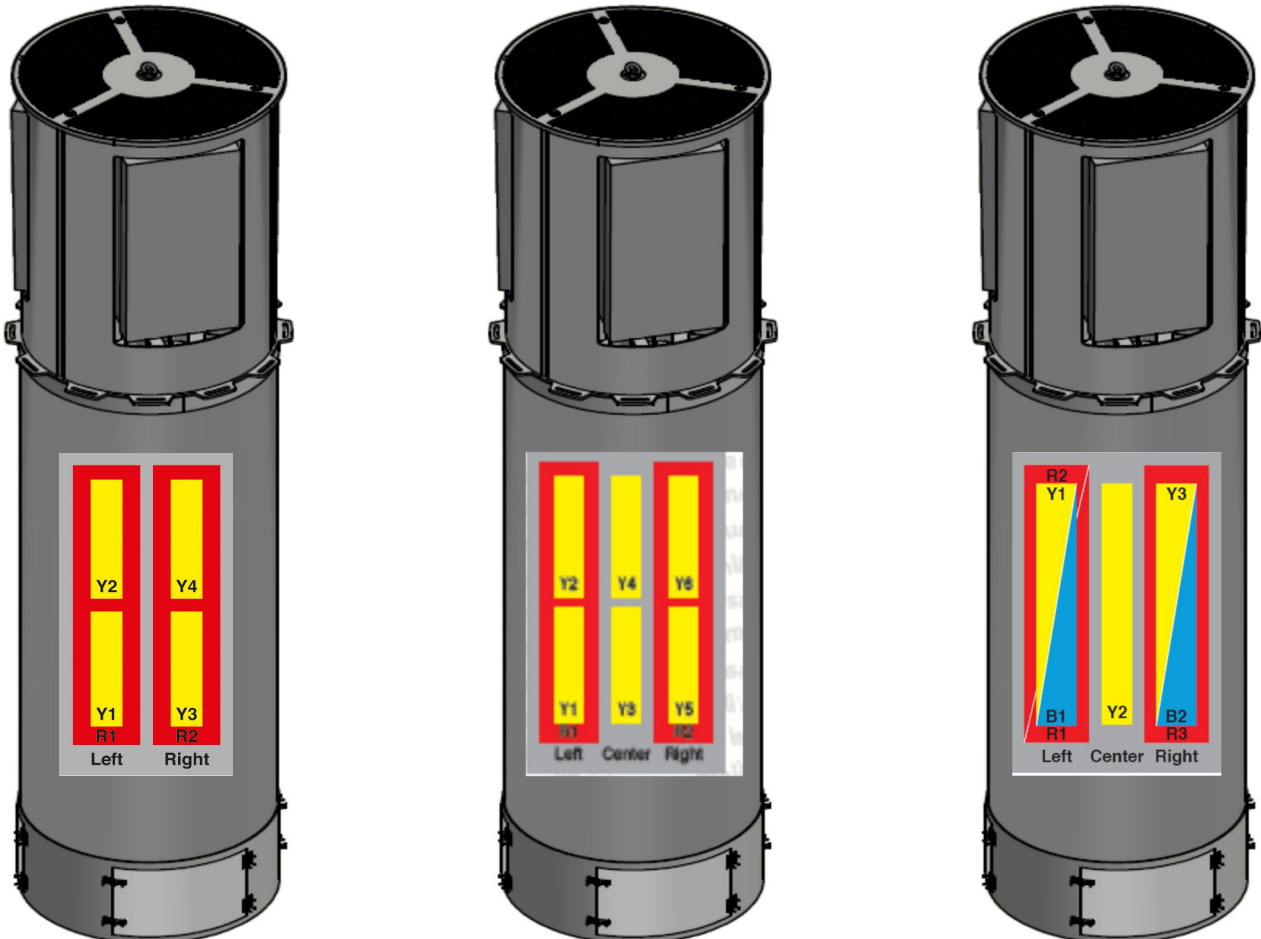

ESB is glad to announce its new development of a camouflage antenna solution for Passive and Active antennas, aiming 2/3/4G Passive rollout with possibility to easy upgrade and host Active 5G antennas from Radio Vendors.

Main Features:

- Passive Antenna for up to 2L6H and variable azimuth ($\pm 10^\circ$)
- Active mechanical interface for pure 5G Active antennas (32T32R or 64T64R)
- Modular design to easy installation
- Extreme heat dissipation design (up to 1.5Kw tested)
- 800mm diameter
- 2.4 + 1.3m length (Passive +Active part)
- Mechanical Tilt possibility for Active Antennas

Product is available from Q12020 and we offer the following Passive configurations among others:

We have also available a wide range of anchoring and mast pole solutions to enhanced and ease the installation on rooftop. Please ask us for further information at:
